ABOUT ALPHA DELTA OIL FIELD SERVICES

Technical Manpower for the UAE's Essential Industries

Established in 2019, ALPHA DELTA OIL FIELD SERVICES LLC - SPC (ADS) is an Abu Dhabi-based technical manpower supply company supporting oil and gas, engineering, construction, offshore, marine and industrial operations.

We help businesses meet their workforce requirements with technical personnel across engineering, project execution, HSE, inspection, NDT, rope access, maintenance and skilled trades. From individual specialist requirements to multidisciplinary project teams, our focus is on connecting the right technical capabilities with the demands of each assignment.

WHO WE ARE

A Technical Manpower Company Built Around Project Requirements

Technical projects depend on people who understand their responsibilities, working environment and discipline. At ADS, technical manpower supply is our core business.

We support organisations that require engineers, supervisors, safety professionals, inspectors, technicians and skilled personnel for onshore facilities, offshore installations, marine environments and industrial sites.

Our approach begins with understanding the work: the technical scope, required experience, qualifications, location, project duration and deployment conditions. These requirements help define the personnel needed and the coordination necessary before mobilisation.

Whether a client is planning construction activities, strengthening an existing team, preparing for a shutdown or supporting ongoing maintenance, ADS focuses on workforce requirements that are practical, clearly defined and aligned with the assignment.

ADS is the service provider division associated with Alpha Dynamic Oil Field Services and General Trading LLC.

OUR PURPOSE

Helping Projects Access the Technical Skills They Need

Our purpose is to help clients address workforce gaps across demanding technical environments.

The right manpower arrangement should support more than headcount. It should reflect the discipline involved, the responsibilities of each role, the operating environment and the client's site requirements.

ADS brings these considerations together through technical manpower support for project delivery, inspection activities, maintenance and operational requirements.

Our Mission

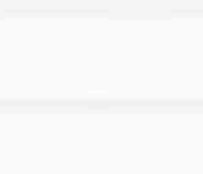

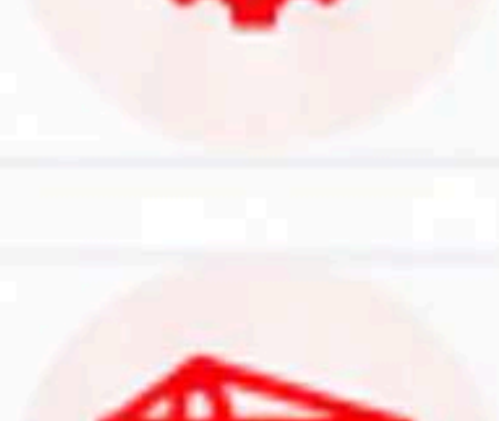

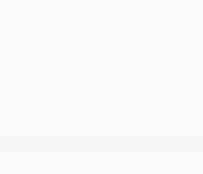

To provide responsive technical manpower services that connect client requirements with suitable personnel, supported by clear communication, attention to competence and a commitment to safe working practices.

Our Vision

To become a trusted technical manpower partner for businesses across the UAE's energy, industrial, offshore and marine sectors.

TECHNICAL WORKFORCE

Engineering & Project Personnel

Engineering and project workforce support across civil, mechanical, electrical, instrumentation and related disciplines.

Requirements may include project engineers, site engineers, planning personnel, project coordinators and technical supervisors supporting construction, installation and project execution.

HSE & Safety Personnel

Health, safety and environmental personnel to support site safety activities, workforce awareness and the implementation of client HSE procedures.

Requirements may include HSE engineers, HSE officers, safety officers and safety supervisors, with qualifications and experience matched to the assignment.

QA/QC & Inspection Personnel

Quality assurance, quality control and inspection manpower for project and industrial environments.

Personnel requirements may cover mechanical, welding, piping, electrical, instrumentation and civil inspection disciplines, depending on the scope of work and applicable client requirements.

TECHNICAL WORKFORCE CONTINUED

NDT Technicians

Non-destructive testing personnel for inspection and asset integrity activities.

Technician selection depends on the required testing method, certification scheme, qualification level, relevant experience and client acceptance criteria.

Industrial Rope Access Technicians

Rope access personnel for work at height and difficult-to-access locations in industrial, offshore and marine environments.

Requirements are assessed against the task, access conditions, technician qualifications, supervision arrangements and site-specific safety requirements.

Mechanical & Skilled Technical Personnel

Technical manpower for mechanical installation, fabrication, maintenance and supporting site activities.

Requirements may include mechanical technicians, fitters, welders, fabricators, riggers and other skilled trades according to the project scope.

Electrical & Instrumentation Personnel

Electrical and instrumentation manpower for installation, testing, maintenance and commissioning support.

Personnel may include electrical technicians, instrumentation technicians and discipline supervisors with experience relevant to the required systems and working environment.

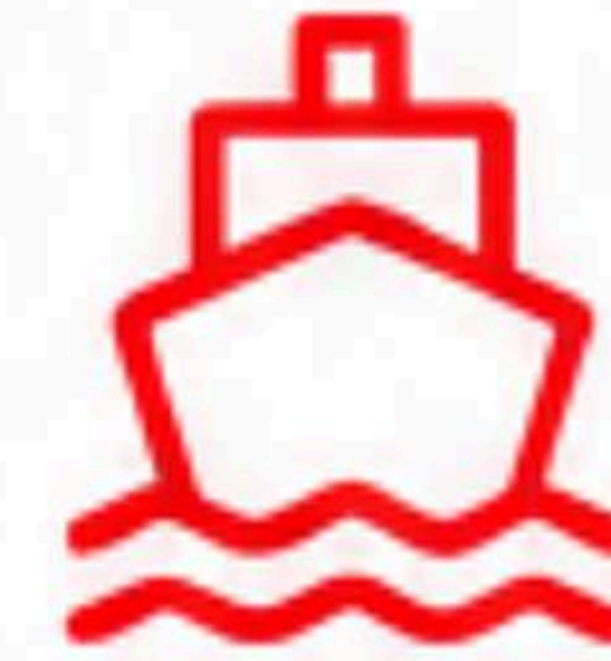

TECHNICAL WORKFORCE CONTINUED

Shutdown, Turnaround & Commissioning Personnel

Workforce support for time-sensitive maintenance programmes, shutdowns, turnarounds and commissioning activities.

These assignments may require several disciplines working to coordinated schedules, with personnel requirements defined around the work package and deployment period.

Offshore & Marine Technical Personnel

Technical workforce support for offshore installations, marine projects, shipyards and associated maintenance activities.

Personnel suitability is considered against the role, offshore or marine experience, required training and the applicable deployment conditions.

INDUSTRIES WE SUPPORT

Technical manpower for UAE energy and industrial requirements.

ADS welcomes manpower enquiries from:

Oil and gas

Refining and petrochemicals

EPC and industrial construction

Offshore energy

Marine and shipyards

Power and utilities

Water and desalination

Manufacturing and industrial facilities

Each enquiry is assessed against the work involved, the required competencies and the operating environment.

FLEXIBLE MANPOWER ARRANGEMENTS

Tell us how your workforce needs to fit the assignment.

ADS considers manpower requirements according to project duration, personnel numbers, location and the agreed service scope.

Project-based assignments

Technical personnel for defined construction, installation, inspection or commissioning work packages.

Short-term requirements

Additional resources for maintenance campaigns, temporary workload increases and specific project activities.

Longer-term assignments

Personnel requirements supporting ongoing operations, maintenance or extended project schedules.

Shutdown and turnaround requirements

Coordinated manpower enquiries aligned with planned shutdown dates and work packages.

Individual specialists and multidisciplinary teams

Support for a single technical position or a combination of engineering, HSE, inspection and trade roles.

Serving Technical Manpower Requirements Across the UAE

From our Abu Dhabi office, ADS welcomes enquiries for assignments in Abu Dhabi, Dubai, Sharjah, Ajman, Umm Al Quwain, Ras Al Khaimah and Fujairah, including associated offshore locations.

Tell us where your project is based and whether the assignment involves a construction site, operating plant, offshore facility, shipyard or industrial workshop. Location and access requirements form part of the deployment discussion.

1

Share your requirement

Send the job titles, number of personnel, work scope, project location, expected start date and assignment duration.

2

Define the technical criteria

Identify required experience, qualifications, certification levels, client approvals and any site-specific conditions.

3

Review proposed personnel and terms

Discuss candidate suitability, availability, commercial arrangements and the responsibilities included in the assignment.

4

Confirm deployment requirements

Agree the documentation, access requirements, reporting arrangements and mobilization schedule before personnel are assigned.

OUR VALUES

The Principles Behind Our Work

Safety Awareness

We place importance on personnel understanding the hazards, procedures and responsibilities associated with their assigned work.

Technical Competence

We focus on the qualifications, experience and practical capabilities relevant to each role.

Accountability

We value clear commitments, defined responsibilities and timely communication with clients and personnel.

Respect for People

We believe professional working relationships begin with respect for the people who deliver the work.

Responsiveness

We aim to respond constructively to changing workforce requirements and project priorities.

Long-Term Relationships

We seek to build lasting client relationships through consistent communication and dependable service coordination.

OUR UAE PRESENCE

Based in Abu Dhabi. Supporting Requirements Across the UAE.

From our office in Abu Dhabi, ADS welcomes technical manpower enquiries for projects and operations across the United Arab Emirates.

We support discussions covering Abu Dhabi, Dubai, Sharjah, Ajman, Umm Al Quwain, Ras Al Khaimah and Fujairah, including onshore sites, offshore locations and marine facilities.

Deployment arrangements depend on the assignment location, personnel availability and applicable client requirements.
